### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The drawings filed 2-20-04 (Figures 8-9B) and 8-18-03 (Figures 1-7B) are approved by the Examiner. The claim language is interpreted as set forth in paragraph 2 and page 8, lines 13-22 of the FINAL. Additionally it is noted that "upright" is defined by the dictionary as "in the vertical position, direction" and "vertical" is defined as "at right angles to the horizon, extending perpendicularly from a plane, upright". Thus claim 3, at lines 2-5, and the last two lines are deemed to recite a standing gather of T-shape and lines 6-16 are deemed to recite a planar extensible portion having a sheet and at least one elastic member attached discretely thereto in the longitudinal direction of the member and the extensible portion and the sheet forming a plurality of linearly parallel hollow ridges with and relative to the elastic member on the wearer contactable surface of the extension portion. Also, there are a plurality of these ridges extending across the width of each of the extensible portions. Note, e.g., page 1, lines 19 et seq, page 4, lines 19-23, page 7, lines 19-22, the paragraph bridging pages 8-9 and the first and last full paragraphs on page 9 of the instant specification with respect to the criticality of such structure. The structure discussed supra in combination with the other structure claimed in claim 3 is not taught by the prior art references of good date, alone or in any combination. The closest prior art to Miyamoto is no longer considered "prior art" since Applicant has perfected the claim for benefit of the filing date of the foreign priority documents by the filing of English translations thereof on 9-15-05.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
